## CAREER OBJECTIVE

FULLSTACK Developer with experience in MongoDB, Express, React, Node.js, TypeScript, JavaScript, and Zustand. Skilled in building scalable full-stack applications, REST APIs, authentication, and modern UI development with React and Tailwind CSS. Focused on clean, efficient, and production-ready code

---

## TECHNICAL SKILLS

**Languages:** javascript, TypeScript,

**Frontend:** Next.js, vue.js, React Native, Tailwind CSS, Shadcn UI, Responsive Design

**Backend:** Express.js, RESTful APIs, API Integration, Zustand

**Databases:** MongoDB, MySQL

**Authentication & Security:** Better Auth, JWT Authentication, Access Token & Refresh Token

**AI & Modern Technologies:** OpenAI API, LangChain, LangGraph, AI Agents, Docker

**Tools & Platforms:** Git, GitHub, VS Code, Postman, Vercel, Netlify, Figma, Canva

---

## PROJECT

**WalletTracker** — Smart expense management platform with AI-driven financial insights and automation | [Live](#) | [GitHub](#)

Stack: Next.js, Node.js, MongoDB, LangGraph, LangChain, OpenAI API, Tailwind CSS

- Built an AI-powered expense management system to automate financial tracking and expense categorization.
- Implemented LangGraph and LangChain supervisor architecture with AI agents for intelligent workflow orchestration.
- Integrated calendar event creation for scheduling meetings, reminders, and financial planning tasks.

**EleBooks** — Full-Stack Digital Library Management System | [Live](#) | [GitHub](#)

Stack: Next.js, Node.js, MongoDB, Tailwind CSS, JWT, Express.js

- Built an Admin Panel to manage users, librarians, books, categories, and overall system operations.
- Implemented a user-friendly interface where users can browse, search, read, and request books online.
- Built a full-stack digital library management platform with Admin, Librarian, and User roles using Role-Based Access Control.

**Kothon AI** - an AI-powered language learning platform using Next.js, Google Gemini API, zustand, shadcn/ui, delivering interactive and personalized learning experiences. | [Live](#) | [GitHub](#)

- Implemented real-time voice-based conversations using the Web Audio API/Audio Context, enabling users to practice speaking, listening, and pronunciation skills through AI-driven interactions.
- Here you can learning about other country language
